

# JASSON LAURENT.

**Frontend Developer & UI/UX designer**

I am an active, creative, and innovative third-year computer science student at Binus University who is passionate about front-end development and UI/UX design. With this, I mastered various applications, videos, and design techniques.

An online home and office cleaning services

Adobe Illustrator

# Projects

**Clean&co** is an online cleaning service that users can call online through the apps platform. This clean&co provides services such as cleaning homes, offices, or any room. Because this project is only in prototype form, I only make it using applications such as Figma, photoshop, and illustrator.

A website created like  
an online cafe

Javascript  
JQuery

# Projects

**Caffeine Line** is a website created like an online cafe that sells menus such as coffee and tea and snacks such as cakes. This website is designed with a contemporary logo and web design that is soft and pleasing to the eye and then made flexible so that it can be used on all types of platforms, such as smartphones and PCs. By That's why Caffeine Line gave us the responsibility of creating a website. In this document/report, we would like to briefly summarize what we worked on from start to finish about all our ideas and pour them into this Caffeine line website. This project requires us to create designs using photoshop, HTML, CSS, JavaScript, and Jquery media.

A system for the Government  
and minister of health

# Projects

**SembuhCovid** is a platform for Covid positive patients who want to get telemedicine directly without taking a long time. By filling out the form independently, the symptoms experienced by the patient and the severity and description so that the doctor can immediately analyze the symptoms experienced by the patient and provide the medicine which medicine will send directly to the patient's home. That's why we created a website called SembuhCovid using HTML, CSS, and JavaScript

A website created like an online restaurant

YEAR  
2022

ROLE  
DESIGNER

#### SOFTWARE USED

Figma  
Adobe Photoshop  
Adobe Illustrator

# Projects

**Menoekuu** is a user interface of an application we created specifically for restaurants that are used to simplify and speed up interactions within restaurants. In this application, users can see the menus of restaurants in collaboration with the Menoekuu application. In addition, this application can make dine-in and take-away orders. So we just created using Figma, photoshop, and illustrator.

# Projects

**reWaste** is an application that can help recycle waste into raw materials that can be reused. So that users can send or put the trash into the places provided by us and will get rewards that users can use to exchange vouchers such as food vouchers and others. Because our project is still in the making process, this is only still in prototype form, so we just created the desired appearance of the application using the Figma, Photoshop, and Illustrator applications.
